Conventions Used In This Manual

Every effort has been used to try to make this manual as useful and informative as possible. To accomplish that goal, several conventions have been used to assist the reader.

Throughout the manual, the terms process and activity are generally used interchangeably.

A Caution

These boxes contain warnings about things that MUST checked, or of items to be aware, before proceeding. In many cases, the advice is to check with the company C.P.A. or other tax advisor.

🄍 Tip

Tips offer you special information, considerations, or other insights when undertaking the task described.

Hyperlink

A hyperlink is shown with an underline as it is shown by default in the program. Hyperlinks may be found in screen forms or in screen previews of reports.

Access

Menu access to selected items is shown in the two or three ways available (depending on the item). Here is an example for access to a functional menu element:

Modular Menu Access

Job | Equipment This represents access to Job Scheduling from the Module menu.

Standard Menu Access

Equipment | Equipment This represents access to Job Scheduling from the Standard menu.

Here are examples accesses to a report from different menus:

Access to Equipment File Report

Module Menu with Reports Group

Equipment | Reports | Equipment List

Module Menu with Reports List

Equipment | Equipment List

Standard Menu

Reports | Equipment | Equipment List

In some instances, individual screen buttons are shown in the text, such as the Magnifying Glass \square icon. The Equipment module is often referred to as EQ.

Equipment – Overview

The Equipment Control module enables users to enter the equipment information into a master file and to apply transactions for the equipment usage to jobs.

Caution

The Equipment module is intended for use with company-owned equipment that is used on jobs, and for which the job cost must be accounted. For rented equipment, transactions should be entered via Accounts Payable, and listed in Job Cost as Cost Type: Other.

🄍 Tip

The Equipment functionality is only available if the Equipment module is installed.

The information maintained through this option includes:

- Equipment Number
- Description
- Serial Number
- Make and Model
- Year

- Fuel Usage (on & off road)
- Maintenance Costs
- Repair Costs
- License Number

- Insurance Policy Number and Expiration date
- Photo
- History
- Notes

The Equipment Transaction option allows equipment usage to be posted the equipment to various jobs. The information maintained through this option is as follows:

Transaction NumberTransaction Date

• Equipment Number

Session Date

Description

- Date
- Equipment Rate
- Hours
- Equipment Amount
- Description

- Job Number
- Change Order Number
- Cost Code
- Total Posted
- Notes

Equipment – Menu Access

Use this option to maintain and distribute company-owned equipment cost to current jobs. Equipment transactions may be posted to current jobs by entering the hours and equipment rate, as well as the cost codes and change order cost codes.

Modular Menu Access

Job | Equipment

Standard Menu Access

Equipment | Equipment

New Record

Initial access to Equipment from the menu opens the Equipment - New form. This form is used to enter new Equipment item information. However, access to a new form when another job record is on the screen only requires pressing Ctrl+N or using the New icon 🗋 on the toolbar. The system will ask if changes to the open record should be saved.

Figure: EQ-1 Equipment Main tab screen form sample.

Editing an Existing Record

The list of Equipment Items can be examined by clicking on the Magnifying Glass icon \Box (at the top of the screen) or pressing Ctrl+F and double clicking on the item of interest. Records can be edited either by using the Search button feature or by using the mouse or cursor keys to select the record to be edited.

Figure: EQ-2 Equipment Find/Search screen.

Scrolling Through Equipment Item Records

Users can scroll through the Equipment Item records by using the navigation buttons on the toolbar \blacksquare at the top of the screen. Clicking on the First icon \blacksquare (at the top of the screen) will open the first record of the list according to Equipment Number. Clicking on the Previous icon \blacksquare (at the top of the screen) will open the immediately previous record of the list according to Equipment Number. Clicking on the Next icon \blacksquare (at the top of the screen) will open the next record of the list according to Equipment Number. Clicking on the Next icon \blacksquare (at the top of the screen) will open the next record of the list according to Equipment Number. Clicking on the Last icon \blacksquare (at the top of the screen) will open the last record of the list according to Equipment Number.

Cloning an Existing Record

Once an Equipment item record is selected, it can be cloned to create a new record and modifications can be made on the cloned record. Once the source record is brought to the screen, use the Clone Record icon \square on the toolbar. The system will ask, "Do you want to clone this record?" Click on the Yes button to clone it or click on the No button to leave this process. Records can be edited as described. However, the cloned record will require a new Item Number to be saved as a new record.

Figure: EQ-3

Cloned record. Note that all of the initial fields except for the Equipment Number and Picture match the source record.

Deleting an Existing Record

Once an Equipment item has been saved, it cannot be deleted if it has been used in any transactions. Once the source record is brought to the screen, use the Delete icon \boxtimes (at the top of the screen). The system will ask, "Do you want to delete this record?" Click on the Yes button to delete it, or click on the No button to leave this process.

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the 🗔 Save button on the toolbar or press Ctrl-S to save the changes.

Equipment Number

Enter the Equipment Number desired. Any 10-digit alpha or numeric character or combination of both can be used in the Equipment Number field. BIS[®] checks for duplication, and a warning will appear if an existing code is entered. The item number can be used as a sort code to group Equipment into various categories.

Please note that the underlined Equipment Number title is a hyperlink field as well as the description of the information to be entered. Right-clicking on the underlined Equipment Number title hyperlink directly accesses the Equipment File report.

Description

This field records the full name or description of the equipment represented by the Equipment Number selected. This is an alphanumeric field limited to 30 characters.

Serial Number

The Serial Number may consist of any alphanumeric characters up to thirty (30) characters in length.

Status

Select the current status of the equipment from the drop-down arrow. The valid status options are Active or Inactive.

Make

This field is used to record the manufacturer of the equipment limited to thirty (30) alphanumeric characters.

Model

This field is used to record model or product version identification of the equipment limited to thirty (30) alphanumeric characters.

Year

This field is used to records the four-digit year in which the equipment was acquired.

Rental Price (per hour)

The Rental/Hour is the rental rate per hour for this piece of equipment and will be used to calculate charges to the job.

Fuel Usage (off road)

Enter the fuel usage off road is the unit (e.g., per gallon) cost for off road fuel for the equipment.

Fuel Usage (on road)

Enter the fuel usage on road is the unit (e.g., per gallon) cost for on road fuel for the equipment.

Average Maintenance Unit Cost

This field is used to records the average monthly cost for scheduled maintenance.

Average Repair Unit Cost

This field is used to records the average monthly cost for unscheduled repairs.

Insurance Policy Number

This 15-character alphanumeric field is used to records the identification number of the insurance policy for the equipment.

Insurance Expiration Date

This field is used to records the last date of insurance coverage purchased for the equipment. The Calendar tool may be used to select the date.

License Number

This field is used to records the license plate number of the equipment using limited to eight (8) alphanumeric characters.

Picture

The Equipment form also allows a bitmap photo of the equipment be displayed. To select a bitmap file, click the Picture button to open an Open Picture dialog box to add or change the bitmap photo file selected. Once selected, the picture will appear in the large box to the lower right of the window. Bitmaps are common to photo and artwork images, and come from many sources. Most graphic software vendors who use other file formats supply some means of converting their own formats to bitmapped images. These files usually contain a BMP file extension. For more information about working with bitmaps, contact a local software vendor.

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the 🗔 Save button on the toolbar or press Ctrl-S to save the changes.

History Tab

This tab displays history for this piece of equipment, including the last job number and name to which the equipment was assigned. It also displays the last date the equipment was used. This history will build automatically as equipment transactions are processed.

Figure: EQ-7 Equipment History tab screen form sample.	Equipment - 1000

Last Assigned Job

This field displays the last job number and name to which the equipment was assigned.

Please note that the underlined Last Assigned Job title is a hyperlink field as well as the description of the information shown. Left-clicking on this hyperlink opens the Jobs – New form to add a new or edit an existing job master record information. Right-clicking on the Last Assigned Job hyperlink opens a selection of reports that can be directly accessed.

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the 🗔 Save button on the toolbar or press Ctrl-S to save the changes.

Udf Tab

This tab will display up to thirteen User Definable Fields that can store additional information in the Master Record. Click the Define Fields Button to add new fields and manage existing fields.

🄍 Tip	The Udf function is generally employed after installation is complete.							
Figure: EQ-9 Equipment Ud form with one a user defined	f tab screen example of	E Equipment - 1000 Lo Main History Udf Last Maintenance Dat Last Maintenance Inf		Define Fields				
		Edit						

Define Fields Button

User Definable Fields may be added to the Equipments, Vendors, Employees, Equipment Items, Worker's Comp. Classifications, Equipment, Sales Tax Codes, Salespersons, Jobs, and Equipment master records for customizable data storage. Up to 13 different fields can be added to each master record. These fields are either character, numeric, date, or logical in nature to give the maximum flexibility in creating exactly the type of field needed to store data.

Sample User Defined Fields	Field	Caption	Туре	Length	Dec	Display Order	
or Equipment screen	MNTDATE	Last Maintenance Dat	D	8	0	1	
orm.	MNTINFO	Last Maintenance Inf	С	120	0	2	
							-

		Edit Delete				Close	

All pre-existing fields will be listed in the User Defined Fields form. New fields can be created and existing fields may be edited or deleted from this form. In addition, the order the fields are listed may be adjusted by changing the Display Order.

Field

This field displays the field name for a User Definable Field that was entered upon creation. Once a field name is assigned, it cannot be altered.

Caption

The Caption field displays the caption that will be shown next to the field on the Udf tab of the associated master record.

Туре

This field displays the letter C (character), N (numeric), D (date) or L (logical) for the field type.

Length

The Length field displays the maximum number of alphanumeric characters that may be saved within this field.

Decimal

The decimal field displays the number of decimal places that will be displayed. Only numeric fields have a value greater than zero.

Display Order

The Display Order field shows the numeric order of the field for the Udf tab of the associated master record. A "1" designates the field as the first or top field on the tab, while higher numbers indicate a lower placed field on the tab. The Display Order value may be changed here for reordering purposes.

New

The New button is used to create a new character, numeric, date or logic field for this Master File.

form.	1. Preferred operator: Mike Evans	
	Edit	

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the Save button on the toolbar or press Ctrl-S to save the changes.

Equipment Reports

This section covers the reports available for Equipment. Access to specific reports begins with the Query screen that enable users to select the particular variation needed. As with other reports in BIS[®], reports can generally be one of 3 types: Summary, Detail, and Extended. Most reports offer the ability to select an "Order By" setting, and often have several choices of fields for that choice. Additionally, most reports have a variety of Options allow certain elements to show or not on the report. Finally, most reports offer a listing of fields that can allow a refined selection of data. The Report Query will be remembered by User Id until changed.

All report options are listed under the Reports menu, and many reports can be selected by right-clicking on a data hyperlink to open a pop-up report menu related to that field. Either method opens a report setup form depending upon the type of report selected. Reports offer the opportunity to view all records and activity for a company. Reports are an easy way to view the effects of specific transactions. They are also a good way to get a summary view of either all transactions of a specific type, all entries for a single account or file.

BIS[®] reports allow the user to enter the exact specifications of what the report will contain. Make it as detailed or simple as needed. Narrow or broaden the search criteria to allow as few as one record, or as many as all records pertaining to the topic.

Once the criteria have been entered into the report form, the report can be viewed on the screen by clicking the Preview button. A window will open to display the report. This is useful for detecting any errors in setting up the report before actually printing it on paper. Use the scroll bars on the right and bottom of the screen to move around the page.

When previewing a report, the usual toolbar will disappear and the preview toolbar appears. After closing the preview of the report and returning to the Report form, the report can be printed. Select Print, either from the File menu or by clicking the Print button on the main tool bar. The Print dialogue box will open. Specify whether to print the entire document or select certain pages to print. Also, select the number of copies desired and which printer to use.

Reports can be viewed on the screen, printed, and exported. In other editions of BIS[®], reports can be exported and emailed in up to six different formats. Most reports have hyperlinks that enable users to either drill down to the source record, or by right-clicking, open a list of other reports and functions related to the hyperlink field selected.

Report Toolbar Controls

There are a number of controls that affect reports and how they are rendered. Initial access comes from the Reports Toolbar

Figure: EQ-16 Report Toolbar

Preview

The Preview icon works with the Report and printing functions, allowing previews in WYSIWYG (What You See Is What You Get) mode. As with other screen elements, these report previews can be tiled or layered with the BIS[®] MSD (Multiple Screen Display).

Print (Ctrl+P)

The BIS[®] Print icon causes the current report to be sent to the print spooler so that it can be printed by the default or selected printer accessible to the sending computer.

Export Report

The Export Report icon exports the current report in up to six different formats, depending on the edition of BIS[®] used. Standard edition users can export in DOS TXT, Microsoft[®] Excel[®] WKS, and Adobe[®] PDF formats. Professional edition users add Microsoft[®] Word[®] and the graphical TIFF formats. Finally, Enterprise edition users can also export in HTML format.

Email Report

The Email Report icon enables Professional and Enterprise edition users to email reports from directly within BIS[®]. The available formats for these editions are the same as listed for Export above.

Preview Toolbar Controls

Once a report is opened, and appears on the screen, an additional Preview Toolbar opens.

Table of Contents

The BIS[®] Table's of Contents icon adds a table of contents to the left side of the screen report. Using a familiar Explorer-style format, each primary record of the report can be directly accessed, eliminating the need for laborious searching.

Show/Hide Ruler

The Show/Hide Rule icon reveals or hides a ruler guide to the top and side of the report. Users of word processing and some graphics programs should be familiar with this feature.

Copy Page

I The Copy Page icon copies the current page of the report to the Windows[®] Clipboard.

Find

³³ The BIS[®] Find icon enables users to find or search for a particular piece of data in the current report.

Display Pages

The Display Pages icon controls how many pages of the report can appear on a single screen and how they are arranged. The choices are: 1x1, 1x2, 1x3, 2x1, 2x2, and 2x3.

<u>Zo</u>om in

The Zoom in icon enlarges the screen image by preset percentages.

<u>Zo</u>om Out

The Zoom in icon reduces the screen image by preset percentages.

Zoom Control

The Zoom Control drop-down allows enlarging or reducing the screen image by preset percentages: 25, 50, 75, 100, 125, 150, 175, 200, 400, and 800, as well as Page Width and Full Page.

Navigation Buttons

The navigation button icons provides a way of moving through pages of the report. In sequence, they are: the First Page, the Previous Page, the Next Page, and the Last Page. The numeric information in the center indicates which page is showing or selected out of the total number of pages in the report.

Backward

He Backward icon reverses the order of the pages of the report that appear on the screen.

EQ-12

Forward

The Forward icon resets the order of the pages of the report that appear on the screen.

Hyperlink Appearance

The Hyperlink Appearance icon controls how the hyperlinks will appear on the displayed report (and any report printed from the preview).

Figure: EQ-17	<u>ab</u>	Blue Underline

Refresh

The Refresh icon updates the report with the latest data from the program.

List Reports

The majority of BIS[®] reports are list reports. This section explains how to set up a list report and define the search criteria on which to base it. If the criteria specified do not yield any records, BIS[®] will not allow the report to be previewed or printed.

My Query

The My Query option enables the user to save multiple sets of query conditions (and is described in greater detail below).

Report Type

Select the type of report, which generally determines the level of detail contained in the report itself. The amount and type of detail available vary from report to report.

Order By

Use the drop down menu tool in the Order By option to select which field should be used to list entries. Some reports can only be ordered by a certain field. If applicable, choose whether the entries will be shown in ascending or descending order. For example, ascending alphabetical listings display A-Z entries, while a descending list orders Z-A entries.

Options

The choices given in the Options box allow the report to be further defined. To select any of these options, check the corresponding box.

Filter

The listing at the bottom of the form defines which records will be included in the report. Data can be selected for inclusion by the fields displayed in this area. A variety of criteria can be used to make the report as narrow or broad as necessary.

First select an operator from the drop down list in the Operator field. Depending on which operator is chosen, the Beginning and/or Ending fields may need to be filled with data based on the field type. Sometimes a drop-down menu is made available in these columns so that records on file can be selected.

Operators

All	Shows all records
=	Displays only records with data matching the data in the Beginning column.
On Date Run	For Date fields only; this dynamic operator uses the system date for the program
Day # of Month	For Date fields only; this dynamic operator uses the pres-selected specific day of the month
First Day of the Month	For Date fields only; this dynamic operator uses the first day of the current month
Last Day of the Month	For Date fields only; this dynamic operator uses the first day of the current month
In	Includes all records contain the data entered in the Beginning column
Between	Shows records that fall between the records listed in the Beginning and Ending columns
Тад	Includes specific records tagged from a drop-down list of records
>	Includes records that have a value greater than that entered in the Beginning column
<	Only shows records with a value less than that defined
>=	Displays records with a value greater than or equal to the defined data
<=	Includes records whose value is less than or equal to the data entered

My Query

The My Query option enables the user to save multiple sets of query conditions including Order By, Field Operators and their settings, and Options. The initial use of My Query shows no saved Queries. If there are existing named queries available they can be seen using the drop-down tool. The saved Query, however, can be applied to any of the available Report Types.

Figure: EQ-18

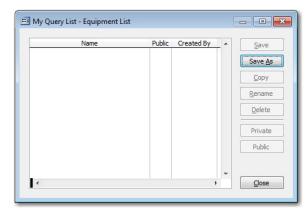

My Query drop-down list sample.

Dump Trucks 🗾 💌	2
Dump Trucks	
Loaders	

As with other system reports, each named query selection can be further refined with the other settings.

Figure: EQ-19

My Query List initial use sample screen form.

Refresh Button

If a query has been saved, and new changes are made to the query settings, clicking on the Refresh button will remove those unsaved changes.

Details Button

A query can be saved by clicking on the Details button. If there are no pre-existing queries, two buttons are available, Save As and Close.

EQ-15

Save

The Save button will save the current settings, but will provide a dialog box asking, "Do you want to overwrite this query?" Click on "Yes" to save the current settings under the selected name, or "No" to not save them under the current name.

Save As

The Save As button opens the Save As Query sub-form.

Name

Use this field to assign a name to the saved query.

Scope

The Scope option allows the user to specify whether the saved query will be kept for private use or be made available to all users with access rights to this information.

Figure: EQ-20

Save As Query List sample screen form showing the two optional Scope selections: Private and Public.

= Save	As Query - Equipment List 🛛 🔗 💽	
Name	Dump Truck 1	
Scope	Private	
	Private Public Qk Cancel	
		2

ОК

Click on the OK button to accept the name and scope selections.

Cancel

Click on the Cancel button to close the form without saving.

Сору

The copy button will copy the current saved query to a new name, and allow changing its scope setting. The newly named query can then be edited and saved again.

Figure: EQ-21 Copy query screen form.

Copy F	rom	
Name	Dump Truck 1	
Copy T	0	
Name		
Scope	Private	

Rename

The Rename button opens the Rename Query form that allows the query to be saved with a new name.

Figure: EQ-22 Rename Query screen form.

Current Name	Dump Truck 1
New Name	

Delete

The Delete button will delete the selected named query. If the query is a public query, the following dialog box question will appear, "This is a public query. Are you sure that you want to delete this query?" If the selected query is not a public query, the system simply asks for a confirmation of the action.

Private

If the query is marked as Private, this button will be grayed out. The user has the option of changing the scope of the query to Public by using the next button.

Public

If the query is marked as Public, this button will be grayed out. The user has the option of changing the scope of the query to Private by using the preceding button.

Close

This button closes the My Query List.

Clear Button

The clear button is located on the tool bar normally at the top of the screen. This button applies only to the report queries. $BIS^{\text{(B)}}$ reports query settings are remembered by user from one session to the next. Thus, if a saved query was last used, the query screen for the same report would open with it preselected. The clear button resets the query screen to the system default.

Equipment Transactions

The Equipment Transactions option is used to enter transaction information for company-owned equipment that is used on jobs.

Modular Menu Access

Equipment | Equipment Transactions

Standard Menu Access

Transactions | Equipment Transactions

New Record

Initial access to Equipment Transactions from the menu opens the Equipment Transactions - New form. This form is used to enter new Equipment Transaction information. However, access to a new form when another Equipment Transaction record is on the screen only requires pressing Ctrl+N or using the New icon \square on the toolbar. The system will ask if any changes to the record should be saved.

Figure: EQ-24 Equipment Transactions – New screen form.	E Equipment Transact Main Notes <u>Transaction Number</u> Transaction Date Session Date Description	l // 07/29/YY	v

Scrolling Through Equipment Transaction Records

Equipment Transaction records can be scrolled by using the navigation buttons on the toolbar \blacksquare at the top of the screen. Clicking on the First icon \blacksquare (at the top of the screen) will open the first record of the list according to the "Trans Num." Clicking on the Previous icon \blacksquare (at the top of the screen) will open the immediately prior record of the list according to the "Trans Num." Clicking on the Next icon \blacksquare (at the top of the screen) will open the next record of the list according to the "Trans Num." Clicking on the Last icon \blacksquare (at the top of the screen) will open the list according to the "Trans Num." Clicking on the Last icon \blacksquare (at the top of the screen) will open the last record of the list according to the "Trans Num." Clicking on the Last icon \blacksquare (at the top of the screen) will open the last record of the list according to the "Trans Num."

					-

Editing an Existing Record

The list of existing Equipment Transactions may be examined by clicking on the Magnifying Glass icon \Box (at the top of the screen) or pressing Ctrl+F, and double clicking on the item of interest. Records can be edited by either using the Search button feature or by using the mouse or cursor keys to select the record to be edited.

Note that when the Equipment Transaction screen form appears, all of the fields at the top are shaded; information cannot be entered into these fields or existing information changed.

To access the information when the record appears on the screen, it is necessary to press the Open icon \square on the toolbar at the top of the screen on the toolbar or by pressing Ctrl+O.

If the Equipment Transaction can be edited or changed, all of its fields will be accessible. Any changes made to a pre-existing Equipment Transaction will result in reversing journal entries being created in both the Equipment and General Ledger Journals, and potentially in the Job Cost Journal. The revised record will be saved with new entries to the affected journals.

Deleting an Existing Record

Existing records can be deleted, but only if there are no existing transactions or other master records dependent on the one selected. Once the source record is brought to the screen, use the Delete icon \boxtimes (at the top of the screen). The system will ask, "Do you want to delete this record? Click on the Yes button to delete it, or click on the No button to leave this process.

Deleting a pre-existing Equipment Transaction will result in reversing journal entries being created in both the Equipment and General Ledger Journals, and potentially in the Job Cost Journal.

Figure: EQ-26 Sample Equipment Transactions screen form

Main Tab

The Equipment Transactions file records all pertinent information related to Equipment Transactions. The information recorded on these tabs is used throughout BIS[®] whenever a vendor invoice is referenced in other transactions or in reports. The Main tab records detailed information about this equipment transaction.

Transaction Number

The Transaction Number field records a transaction number that is used to identify this record. It may be any combination of characters or digits up to ten positions in length.

Transaction Date

Figure: EQ-28 Calendar tool.

The Transaction Date field records the date for the transaction. This is usually the current date, but it could be a previous date. The date may be typed or entered using the Calendar tool.

Feb	oruary	YYYY	Feb	ruary	~ Y	YYY E
Sun	Mon	Tue	Wed	Thu	Fri	Sat
31	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	1	2	3	4	5	6
7	8	9	10	11	12	13

Session Date

The Session Date field records the session date for the transaction. This is usually the current date, but it could be a previous date. The date may be typed or entered using the Calendar tool.

Description

The transaction description field is used to record a brief description or comment, up to 30 characters that identify the general purpose for the transaction; for example, "Trenching," "Hauling," or "Hoisting A/C."

EQ-20

Column Fields

Two buttons on the toolbar are useful when modifying or editing the grid area on a screen form. The Insert Line icon \blacksquare (or Ctrl+I) adds a blank line to the current grid of the form that is open. The Delete Line icon \blacksquare (or Ctrl+J) removes the currently highlighted line from the grid of the open record.

Equipment

The equipment number column is used to record the code of the equipment item used in a job. BIS[®] verifies that the item number exists and displays equipment name Summary section below.

Date

The date column records the date of service of the equipment selected. The date may be typed or entered using the Calendar tool.

Rate

The rate column displays the default rental price for this item. The number entered in this column may be changed on-the-fly by the user.

Amount

This column calculates the extended amount (rate times the hours) for this line item.

Description

This field is used to record a brief description for the transaction line item. Entering a concise description can save time otherwise spent looking for the original document to determine why an entry was made. This is an alphanumeric field limited to 30 characters. To record an extended description for this item, click the button to open a Notes box, where unlimited information related to this line item may be stored.

Report Code

The Report Code column is used to record a report code related to the line item, which can be used for creating customized reports.

Job

If the account number selected for the line item has been assigned a Job Cost Type, the button in this column will open the Job Cost screen, where the item can be posted to a specific job, change order, and cost code.

The Job Cost screen allows transaction line items to be applied to the Job Cost files. The job cost fields are only available if the account number selected for the line item is assigned a Job Cost type Material in the Chart of Accounts. To reach this box, click the Job button that appears in the final column of the Equipment Transaction entry table.

			OK Cancel

Budget/Change Order Radio Buttons

If the Payable expense applies to a budget item, select the Budget radio button. If the payable expense applies to a Budget Change Order item, select the Change Order radio button.

Job Number

Enter or select a Job number to be associated with this invoice line. The job number may be entered manually or by using the Find tool, the Magnifying Glass icon in or pressing Ctrl+F.

Change Order

If the Change Order radio button was selected, the Change Order field becomes available for entry. Enter or select a change order number to be associated with this invoice line. The change order number may be entered manually or by using the Find tool, the Magnifying Glass icon is or pressing Ctrl+F.

Cost Code

Enter or select a Cost Code to be associated with this invoice line. The cost code number may be entered manually or by using the Find tool, the Magnifying Glass icon .

The program will offer to allow choosing either a cost code already in the budget (Job Budget) or a cost code not in the budget (Cost Code). If the selected cost code is not in the budget already, it will be added to the budget for this job.

Save the Record

When the record is complete or satisfactorily completed, either click on the OK button in the sub-form or the Cancel button to do further editing of the entries.

Line Detail Area

This area displays additional information pertaining to the line item selected, including the equipment description. Also displayed are the job, cost code, change order and/or cost type from the Job Cost files.

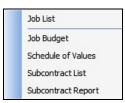

Equipment Description

This field displays the Equipment Description. Please note that the underlined Equipment Description title is a hyperlink field as well as the description of the information to be entered. Left-clicking on this hyperlink opens the Equipment - New form to add new Equipment items. Right-clicking on the Account Name hyper-link accesses the Equipment File report.

<u>Job</u>

This field displays the Job number applicable to the selected line item. Please note that the underlined Job title is a hyperlink field as well as the description of the information to be entered. Left-clicking on this hyperlink opens the Jobs – New form to add a new Jobs. Right-clicking on the Jobs hyperlink opens a selection of reports that can be directly accessed.

Figure: EQ-30 Reports directly accessible by right-clicking on the field name hyperlink.

Cost Code

This field displays the Job number applicable to the selected line item. Please note that the underlined Cost Code title is a hyperlink field as well as the description of the information to be entered. Left-clicking on this hyperlink opens the Cost Code Library – New form to add a new cost codes. Right-clicking on the Cost Code hyperlink access the Cost Code Library report.

Change Order

If the focus is on a line that is related to a subcontract change order, this field displays the Change Order applicable to that line item.

Cost Type

This field displays the Cost Type applicable to the selected line item.

Summary Area

This area displays summary information pertaining to the Equipment Transaction including the Equipment account number and name and total of the Transaction.

Total Posted

This field displays the total of all the Equipment Transaction line item amounts.

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the 🖬 Save button on the toolbar or press Ctrl-S to save the changes.

Notes Tab

The Notes section is a work area for miscellaneous notes and may be used as needed.

Figure: EQ-31

Equipment Usage — Extended Report

Appendix

Cost Code Library

The cost code library is a fundamental element of BIS[®]. Cost codes allow a job to be segmented into components and can be established for specific job functions such as general requirements, fees and licenses, demolition, foundation, framing, rough electrical, HVAC, roofing, plumbing, etc. Together with job numbers and cost type, cost codes classify the job cost. When payroll information is entered, the cost code is also used to record the portion of the job on which the employee worked. The Job Budget, Subcontract Control, and Job Billing sections of the program each use the cost codes established in the Cost Code Library. At the time a company is created, using the New Company form, an option is given to load one of 10 sample cost code libraries are in the Appendix to this manual. A Cost Code library can also be copied from one company to another. Some details will be found in the Appendix.

Normally, an individual job will include only a portion of the codes in the library. Establishing a complete cost code library will allow a consistent method of collecting and estimating costs on jobs to be built. This process provides the ability to draw upon past experience to better estimate future performance. A complete cost code library will also save time.

🄍 Tip

More information about the Cost Code Library may be found in the Job Cost Module manual. The information here is limited to Equipment.

	New	

Main Tab Cost Code

Enter the cost code relevant to the equipment module. Any 10-digit alpha or numeric character or combination of both can be used for the Cost Code. BIS[®] checks for duplication, and a warning will appear if the code has already been assigned.

Please note that the Cost Code title is a hyperlink field as well as the description of the information to be entered. Right-clicking on the Cost Code hyperlink opens access to the Cost Code Library report that can be directly accessed.

The cost codes each identify a task and they are maintained in the cost code library. The cost code can be any combination of numbers and/or letters up to ten characters in length. It is suggested that all cost codes be made the same length. For example, if a five-digit cost code is assigned, continue to assign all additional codes five-digit numbers. The cost code can be retrieved to assign the corresponding task to a job-related expense or budget.

Description

Enter a description of the task or job function that is associated with the cost code listed, up to 30 characters.

Unit Cost Equipment

The unit cost determines the cost of this category (Equipment) for each unit of measurement. Simply enter the number expressed as a number with two decimals. For example, a unit cost of 10 may be entered as 10.00.

Unit Man Hours

The unit man hours determines the number of hours needed to complete one unit of measurement. The UMH may be expressed as a number with two decimals.

Save the Changed Record

When the record is complete or satisfactorily edited, you should either click on the 🗔 Save button on the toolbar or press Ctrl-S to save the changes.

Jobs

The Jobs form is a master record that must be completed before the budget, schedule of values, subcontracts, or any transactions can be recorded for that job, and before job costs can be posted. Default information entered in the Jobs form will be used in a variety of transactions, including applications for payment and payroll. Most defaults entered in the job record can be changed at the time of entering an individual transaction. The use of defaults is encouraged because it can save time and provide for more accurate entry.

🔍 Tip

More information about the Job Master Record and setup may be found in the Job Cost Module manual. The information here is limited to Equipment.

Markup Tab

Job markups are set up on the Markups tab of the Jobs master record. These markups are used in two ways:

- 1. When creating the schedule of values from the job budget, BIS[®] will add the markups shown to the original budget amounts only if the Include Amounts to Schedule of Values option is marked.
- 2. When using the Cost Plus billing option, separate markup percentages are recorded for each job cost type and for change orders. To include the markups when job expenditures are used to update the schedule of values, the Cost Plus Markup option must be selected in the Billing Method field on the Markup tab.

The markup tab is used for Cost Plus billing. Two sections are provided for entering markup percentages: Scheduled Values and Change Orders. This allows users to bill change orders differently from the original contract, if desired. This option may be disabled by selecting Cost Only under Billing Method. The entries of this screen can be used when automatically creating a Schedule of Values from a Budget.

up tab screen form.	<u>M</u> ain <u>D</u> efa	ult <u>O</u> wner	Architect	<u>T</u> &M	Unit <u>Billing</u>	Markup	Payroll	History	UDF	Notes

Equipment %

The percentage markup to use for equipment when the amount to bill is based upon a cost-incurred calculation. The amount billed will equal the job-to-date equipment cost incurred, plus the equipment cost multiplied by this percentage, less previous billings and retention.

Save the Changed Record

When the record is complete or satisfactorily edited, either click on the 🗔 Save button on the toolbar or press Ctrl-S to save the changes.

Budget

The BIS[®] job cost feature allows users to track actual expenditures for each job and compare these costs with the job budget. This is an essential tool for profit planning. The job cost files are unrelated to the general ledger. Therefore, job cost information remains in the system even after a fiscal year is closed and detailed financial data is purged. BIS[®] retains detailed job cost information until the job is closed.

🔍 Tip

More information about the Job Budget may be found in the Job Cost Module manual. The information here is limited to Equipment.

Expenditures are recorded to the job cost file in two ways:

- 1. Directly, through job-related transactions that are posted to budget cost codes and change orders.
- 2. Indirectly, through the use of production expenses.

Each time a direct job cost is posted through a transaction, BIS[®] will require the user to associate that entry to a job cost code, or change order and cost code. There is no risk of forgetting to post the job cost, since BIS[®] will not save the transaction without this information. These direct job costs can also be used to update the job billing by using the Cost Plus billing feature.

EQ-37

Budget Tab

The budget information for each job is maintained through the Budget tab. This tab displays all budget line items by cost code. Each line item contains cost classifications for Labor, Material, Subcontracts, Other, Equipment, and the billing code. A budget for labor hours is maintained separately, as are adjustments to the initial budget.

🄍 Tip

More information about the Job Budget setup may be found in the Job Cost Module manual. The information here is limited to Equipment.

The budget information is used in various BIS[®] reports showing comparisons between the budget and actual costs incurred. Line items are added using the Insert button and can be removed by selecting the line item to be removed and clicking the Delete button. To edit any of the line items viewed, double-click on the line item to open the Budget data entry form.

Job Number

This field displays the Job Number (and Job Name), but it is not an editable field.

Cost Code

A valid cost code from the cost code library must be entered for each change order budget item. This code may be typed or selected by using the Find tool magnifying glass icon. Once the cost code is entered, the cost code description will be displayed.

Billing Code (SV)

Figure: EQ-51 Budget, sample screen

form.

The billing code identifies the contract line item in the Schedule of Values. It may be typed or selected using the Find tool magnifying glass icon. Including the billing code in the budget item interfaces the cost code selected with the billing code when using the Cost Plus option in the Billing module. If the billing code is left blank, this cost code will post cost to the first contract line item on the Schedule of Values. If you wish not to post cost, enter NONE as the billing code. When a billing code is entered, the associated description is displayed.

Budget

The fields in this section are used to record original budget information for the various job cost classifications. They record the dollar amount budgeted for each category for this cost code. The sum of these entries is shown in the Total Budget field.

Quantity

If a quantity of units applies to the cost code, it is entered in this field.

Hours

If a number of hours apply to the cost code, it is entered here.

Equipment

If any portion of the cost of the code applies to equipment, the dollar amount is entered into this field.

Adjustments

This section records adjustment to the original budget information, broken down by job cost classification. The total amount for all adjustment costs is displayed in the Adjustments field.

Subcontract Summary

This section displays the total subcontract amount budgeted for the cost code selected (Revised Budget), the amount from this that has been committed, and the amount that remains uncommitted to vendors.

🄍 Tip

Change Orders Tab

This tab is used for maintaining all cost information for change orders recorded for the job selected. The screen form is divided into two sections, one dealing with the Budget Change Orders and their connection, if any to Change Orders in the Schedule of Values. The lower section deals with the detail of the cost codes associated Budget with the selected change order of the upper portion of the screen.

More information about the Job Budget Change Order Tab may be found in the Job

Change Order Header List

The top section of this form displays information for each change order entered. To add a change order, use the Insert button that is located below this section. To remove an item, select the line item and click the Delete button. To edit one of the change orders displayed, double-click on that line item to open the Change Order Header form.

Change Order Detail List

The lower section of this form displays the budget line items for the change order selected above. The change order number and description selected appear in the fields above this section. Line items are displayed by cost code, including cost classifications for Labor, Material, Subcontracts, Other, and Equipment. The Insert button below is used to add a line item, whereas the Delete button will remove the line item selected. To edit a line item displayed, double-click on that line item to open the Change Order Detail form.

Change Order Detail Form

Use this Form to enter Change Order Line Item Detail Information. The change order information for a job is entered, revised, reported on, deleted, and added to another job through this option. Change Order information is maintained by cost code for each job. Change Orders within each cost code can be maintained for cost classifications of Labor, Material, Subcontracts, and Other.

Job Number

This field displays the job number and name.

Change Order

This field displays the change order number and description.

Cost Code

A valid cost code from the cost code library must be entered for each change order budget item. This code may be typed or selected by using the Find tool. Once the cost code is entered, the cost code description will be displayed.

Budget

The fields in this section are used to record original change order budget information for the various job cost classifications. This field records the dollar amount budgeted for each category for this cost code. The sum of these entries is shown in the Total Budget field.

Quantity

If a quantity of units applies to this cost code, it is entered in this field.

Hours

If hours apply to this cost code change order, they are entered here.

Equipment

If any portion of the cost of this change order code applies to equipment, the dollar amount is entered into this field.

Adjustments

This section records adjustment to the original change order budget information, broken down by job cost classification. The total amount for all adjustment costs is displayed in the Adjustments field.

Subcontract Summary

This section displays the total subcontract amount budgeted for the cost code selected of the change order (Revised Budget), the amount from this that has been committed, and the amount that remains uncommitted to vendors.

Totals Tab

This tab provides a summary of the budget and change orders and their totals. The fields on this screen cannot be modified from this form.

Figure: EQ-56 Job Budget – Detail Report, showing Equipment detail.

Production Expense

This option allows a company to allocate for those overhead expenses which are difficult to directly assign to a job. The production expenses are based on a beginning date. Thus, there can be several records to apply different percentages for different periods. Expenses are entered as a percentage for Labor, Material, Subcontract, Other Direct Expense, and Equipment. Each time an expenditure is applied to the job cost file for any job, the appropriate percentage for that type will also be applied.

> More information about the Production Expense settings may be found in the Job Cost Module manual. The information here is limited to Equipment.

🔍 Tip

Beginning Date

This field records the date to begin applying production expenses. The date may be entered manually or by using the Calendar tool. Please note that the Beginning Date title is a hyperlink field as well as the description of the information. The Production Expense Report is directly accessed by right-clicking on the Beginning Date hyperlink.

Production Expense Equipment

This field records the percentage by which equipment costs will be increased.

Apply Production Expense

To apply the production expense values to jobs, check this box by clicking on it. Clicking on the box will toggle this option on and off.

Production Expense Report

The Job Cost Production Report shows production expenses recorded.

🔍 Tip

More information about the Production Expense settings may be found in the Job Cost Module manual. The information here is limited to Equipment.

Job Number

This field displays the number of the job selected.

Job Name

This field displays the job name that corresponds to the job number selected.

Cost Code

This field displays the cost code associated with the budget item selected.

Installed Quantity

This field records the quantity of units that have been installed.

Percent Complete

These fields record the percent complete separately for Labor, Material, Subcontract, Other and Equipment categories related to this cost code.

Projected Cost to Complete

These field records the projected cost to complete work related to the cost code. They are recorded separately for Labor, Material, Subcontract, Other, and Equipment categories.

Screen Buttons

Save

This button saves the currently displayed data entered.

Close

The Close button closes the currently open form and eliminates any data entered since the last Save.

Undo

This button removes any changes on the entry form.

Change Orders Tab

The budget information displayed here is maintained through the Budget and Change Orders form. This tab can be used to override the percent of work completed and the projected cost to complete work for change orders related to the job selected.

🄍 Tip

More information about the Job Status Change Orders Tab settings may be found in the Job Cost Module manual. The information here is limited to Equipment.

Change Order Header List

The top section of this form displays information for each change order entered.

Figure: EQ-63 Job Cost, Job Status, Change Orders tab screen form sample.

Change Order

The change order number identifies the budget and Schedule of Values information for each change order.

Description

This field lists the description of the change order that is associated with the change order number assigned.

Change Order (SV)

The optional change order number is in the third column. When the change order number is entered, the change order description is displayed.

Change Order Detail List

The lower section of this form displays the budget line items for the change order selected above. The change order number and description selected appear in the fields above this section. Line items show the percent of work completed and the projected cost to complete work for each cost classification, including Labor, Material, Subcontracts, Other and Equipment. To edit any of the items viewed, double-click on the line item to open the Status Change Order data entry form.

Status Change Order

This option is used to override the system-calculated figures for work completed and projected cost to complete budgeted items for a job. These figures can be added manually for each Job Cost classification (Labor, Material, Subcontracts, Other and Equipment) related to this change order cost code.

Job Number

This field displays the job number and name.

Change Order

This field displays the change order number and description.

Cost Code

This field displays the cost code associated with the budget item selected.

Installed Quantity

This field records the quantity of units that have been installed.

Percent Complete

These fields record the percent complete separately for Labor, Material, Subcontract, Other, and Equipment categories related to this cost code.

Projected Cost to Complete

These fields record the projected cost to complete work related to this cost code. They are recorded separately for Labor, Material, Subcontract, Other, and Equipment categories.

Job Cost Status Report

The Job Cost Status Report offers a snapshot of the job status, comparing budgeted amounts against actual costs and commitments. This report may add a message at the end of applicable jobs, "The above figures may not reflect totals for all cost codes and change orders." This message points out that it is possible to produce a report that omits those elements as a part of the filter and option criteria.

🌵 Tip	More information about the Job Cost Status reports be found in the Job Cost Module manual. The information here is limited to Equipment.
🌵 Tip	Optionally, this report can overwrite the Percent Complete and Projected Cost to Complete with figures manually entered in Job Cost Status.

The group number filter option allows you to report group cost codes together. The number selected will group together cost codes that have the same numbers for the number of digits selected. For example, to group all codes that begin with the same first three numbers, select a group number of "3." Cost codes that share the first three numbers are summarized and shown on one line in the report.
